SUMMARY

Full-Stack Software Engineer with hands-on experience building and deploying modern web applications using React, Next.js, TypeScript, Node.js, Express, Python, MySQL, and MongoDB.

Experienced in developing responsive user interfaces, designing REST APIs, integrating third-party services, implementing authentication systems, and deploying production applications using Docker, Vercel, and Render.

Strong background in debugging complex application issues, improving performance, building reusable component architectures, and delivering scalable full-stack solutions. Comfortable working across frontend, backend, databases, deployment pipelines, and product development lifecycles.

Passionate about solving real-world problems through software, rapidly learning new technologies, reviewing code, evaluating software quality, and building production-ready applications from concept to deployment.

EDUCATION

Full-Stack Web Development Training, Comprehensive training covering frontend development, backend engineering, databases, API development, deployment workflows, and modern software engineering practices.

EXPERIENCE

Independent Full-Stack Developer

2020 – Present

Design, develop, deploy, and maintain modern web applications for personal projects and client-focused solutions.

- Built full-stack web applications using React, Next.js, Node.js, TypeScript, and modern frontend tooling.
- Developed reusable UI component systems that improved maintainability and consistency across projects.
- Designed and integrated REST APIs for application functionality, data management, and third-party service integration.
- Implemented authentication workflows, protected routes, and user-focused application experiences.
- Designed database structures and integrated MySQL and MongoDB for scalable data management.
- Optimized application performance through efficient frontend rendering, API usage, and modern development practices.
- Debugged and resolved frontend, backend, and deployment issues across production environments.
- Managed deployments using Docker, Vercel, and Render while maintaining application reliability.
- Built responsive user interfaces that function consistently across desktop and mobile devices.
- Collaborated with stakeholders to translate business requirements into production-ready software solutions.

PROJECTS

TaskKash | Web3 task and rewards platform that enables users to complete blockchain-related activities and earn rewards.

- Technologies: Next.js, React, Node.js, APIs, Wallet Integration, Web3
- Developed task management workflows and reward distribution systems.
- Integrated wallet-based user interactions and blockchain-focused functionality.
- Implemented authentication and user account management features.
- Built responsive interfaces optimized for desktop and mobile devices.
- Structured application architecture for maintainability and future scalability.

CyberYearn | Cybersecurity learning platform providing educational content, resources, and training experiences.

- Developed modern responsive user interfaces for educational content delivery.

- Implemented authentication and user access workflows.
- Integrated APIs for dynamic content management.
- Improved application usability and performance across devices.
- Focused on scalable frontend architecture and maintainable code organization.

Criminology | Platform for exploring verified digital content and information.

- Built responsive search-driven user experiences.
- Integrated backend data sources and content retrieval workflows.
- Designed modern frontend architecture using React and Next.js.
- Implemented scalable UI patterns and responsive layouts.

ShopDotFun | Marketplace platform for buying and selling physical and digital assets.

- Developed marketplace functionality and product discovery workflows.
- Implemented user authentication and account management systems.
- Designed responsive product listing interfaces.
- Structured the platform for future payment and transaction integrations.
- Built reusable frontend components to support platform growth.

Printers FX | Corporate portfolio website for a printing business.

- Built responsive business-focused landing pages and service presentation sections.
- Implemented SEO-friendly frontend architecture.
- Improved user experience through clean navigation and modern UI design.
- Optimized performance for fast loading and accessibility.

ShillMonger Portfolio | Personal portfolio showcasing software engineering projects and technical expertise.

- Developed an interactive project showcase platform.
- Implemented responsive layouts and modern UI patterns.
- Optimized performance and user experience.
- Created a centralized location for demonstrating technical capabilities and completed projects.

TECHNICAL SKILLS

React.js

Next.js

TypeScript

JavaScript (ES6+)

HTML5

CSS3

Tailwind CSS

ShadCN UI

Bootstrap

Responsive Web Design

Node.js

Express.js

REST API Development

Authentication & Authorization

Directus Headless CMS

Python

MySQL

MongoDB

Docker

Deployment Automation

Environment Configuration

Application Monitoring
Performance Optimization
Wallet Integration
Blockchain Task Platforms
Web3 Authentication
On-Chain User Workflows
Git
GitHub
Postman
VS Code
ChatGPT
AI-Assisted Development Workflows
Prompt Engineering
AI Code Generation & Evaluation
Vercel
Render

TECHNICAL ACHIEVEMENTS

- Built and deployed multiple production web applications across different industries and use cases. - Developed full-stack solutions from initial concept through deployment and maintenance. - Implemented responsive UI systems using modern React and Next.js architecture. - Designed REST APIs and integrated databases for scalable application functionality. - Delivered applications using modern deployment platforms including Vercel and Render. - Applied debugging, troubleshooting, and performance optimization techniques across frontend and backend systems.

CORE COMPETENCIES

- Full-Stack Software Development - React Development - Next.js Development - TypeScript Development - REST API Design - Backend Development - Frontend Architecture - Responsive UI Engineering - Database Design - Authentication Systems - Web Application Security - Deployment & DevOps - Debugging & Troubleshooting - Code Review - Software Evaluation - Technical Problem Solving - Scalable Application Design - AI-Assisted Development

ADDITIONAL INFORMATION

Additional projects available through portfolio.
